The government has recently shifted the burden of payment to the patient. There is no OHIP coverage for these services.

If you should have supplementary insurance, please let us know. Supplementary insurance may now begin to pay for the fees of chiropractors from the first visit. You must check with your own insurance company to see if your coverage includes chiropractic.

Chiropractic services are fully covered under the Workman's Safety and Insurance Board (WSIB) and Motor Vehicle Accident (MVA) insurance when the claim has been accepted. If the WSIB, MVA or any other insurance company denies a claim, the patient is then responsible for payment.

If you are a patient and have school age children (16 years of age and under or students) we give the children a reduced rate of $35.00/visit.

You may choose to enter into a treatment program and receive a discount for the block of treatment. The doctor will go over this with you.

I have read and fully understand and agree to the above fee schedule.
